

# InBrace the Smile of Your Dreams

Premiere Orthodontics delivers high quality, fast and effective orthodontic treatment results for children, teens and adults, fit for any fairytale ending.

**W**alt Disney once said that the secret to making your dreams come true is curiosity, confidence, courage and constancy, with the greatest of these being confidence. At Premiere Orthodontics, confidence is also at the forefront of why they do what they do – making smile dreams come true.

“My number-one goal is to give every patient the smile of their dreams. No one else will work harder to make that a reality,” says Dr. Jason Battle, DDS, CAGS, of Premiere Orthodontics.

A beautiful smile not only improves your image but it boosts your confidence. Even now, during times of stress, exhaustion and seemingly never-ending uncertainty, familiar activities such as working out or getting a haircut make you feel good and have the power to completely change your mood. Dr. Battle says teeth are an important part of that.

“When you look good, you feel good. When you feel good, you do good.” says Dr. Battle.

Over the past several months, Dr. Battle has brought new, revolutionary technology into his practice that corrects common orthodontic concerns quickly, effectively and invisibly through an option called InBrace. Premiere Orthodontics is central Florida’s only InBrace provider. It is teeth straightening on autopilot with a personalized Smartwire™ hidden behind your teeth that gently perfects your smile.

“InBrace is a great option for adults who don’t want braces because they are unsightly, don’t want to deal with aligners because of the maintenance and disruption, but still want to straighten their teeth,” says Dr. Battle.

Over the past several years, Dr. Battle has also brought new technology into his practice that reduces the number of orthodontics visits required of his patients. An initial visit is no longer necessary to establish patient goals and treatment plans, and many follow-up visits can also be completed through virtual appointments. Not only does this offer peace of mind, but it also makes the process much easier.

Using a traditional method for a clear aligner treatment plan using Invisalign and 3M, with minimal assistance from visible braces, aligners are changed out every one week. The accelerated treatment plan allows Dr. Battle to cut the treatment time in half. Even complex surgical cases involving major under bites and over bites can be handled with the same treatment plan as more simple orthodontics cases, and these patients can take advantage of virtual visits, too.

“My patients can reach their smile goals faster with the accelerated treatment plan, and I’m there for them every step of the way,” Dr. Battle says. “I’ll do whatever it takes to get them to happiness.”

The highly trained team at Premier Orthodontics works hard each and every day to provide friendly, high-quality orthodontic care to children, teens, and adults. Dr. Battle has been practicing orthodontics since 2004, with a focus on accelerated (fast) and cosmetic (nearly invisible) orthodontics. He promotes an open, respectful environment where all patients are listened to and treated as valued members of the practice family. **L**
